

AMENDMENT TO THE CLAIMS

1. (Currently Amended) A system for claiming a user-specific website where a website request is made for the user-specific website and at least one phone number is associated with the user-specific website, the system comprising:

a phone call receiving device; and

a phone number detection device coupled to said phone call receiving device and a system website coupled to the Internet;

wherein:

the website request is performed at [a] the system website in response to a request by the user, establishing a website claim to the user-specific website; and

the website claim is confirmed by receiving at the phone call receiving device a phone call from the user, where the at least one phone number associated with said user-specific website is verified by the phone number detection device.

2. (Original) The system of claim 1 wherein the website claim is completed by acceptance of the user-specific website by phone.

3. (Original) The system of claim 1, wherein the website request is performed by completing an electronic form at the system website.

4. (Original) The system of claim 1, wherein the website claim is valid for a pre-defined length of time.
5. (Original) The system of claim 1, wherein the at least one phone number may also be verified by asking a user for the at least one phone number, disconnecting, and calling the user back at the at least one phone number.
6. (Original) The system of claim 1, wherein the confirmation of the website claim also requires the entrance of a personal identification number.
7. (Original) The system of claim 6, wherein the personal identification number is provided to a user at the system website upon establishing the website claim.
8. (Currently Amended) A method for claiming a user-specific website associated to one or more phone numbers, comprising the steps of:
- performing a website request at a system website in response to a request by the user to establish a website claim to the user-specific website;
 - confirming the website claim by receiving at a phone call receiving device a phone call from the user;
 - detecting by a phone number detection device a phone number from the phone call from the user; and

verifying that a phone number associated to the user-specific website corresponds to [a] the phone number detected by a phone number detection device coupled to said phone call receiving device.

9. (Original) The method of claim 8 further comprising:

completing by phone the website claim by acceptance of the user-specific website.

10. (Original) The method of claim 8, wherein the website request is performed by completing an electronic form at the system website.

11. (Original) The method of claim 8, wherein the website claim is valid for a pre-defined length of time.

12. (Original) The method of claim 8, wherein the at least one phone number may also be verified by asking a user for the at least one phone number, disconnecting, and calling the user back at the at least one phone number.

13. (Original) The method of claim 8, wherein the confirmation of the website claim also requires the entrance of a personal identification number.

14. (Original) The method of claim 13, wherein the personal identification number is provided to a user at the system website upon establishing the website claim.

15. (Currently Amended) A system for claiming a user-specific website where a website request is made for the user-specific website and at least one phone number is associated with the user-specific website, the system comprising:

a phone call receiving device; and

a phone number detection device coupled to said phone call receiving device and a system website coupled to the Internet;

wherein:

the website request is performed by receiving a phone call into the phone call receiving device from the user, where said at least one phone number associated with the user-specific website is verified by the phone number detection device, establishing a website claim to the user-specific website; and

the website claim is completed by accessing [a] the system website and accepting the user-specific website.

16. (Original) The system of claim 15 wherein the website claim is valid for a pre-defined length of time.

17. (Original) The system of claim 15, wherein the at least one phone number may also be verified by asking a user for the at least one phone number, disconnecting, and calling the user back at the at least one phone number.

18. (Original) The system of claim 15, wherein the confirmation of the website claim also requires the entrance of a personal identification number at the system website.

19. (Original) The method of claim 18, wherein the personal identification number is provided upon calling into the phone call receiving device.

20. (Currently Amended) A method for claiming a user-specific website associated to one or more phone numbers, comprising the steps of:

performing a website request for the user-specific website by calling into a phone call receiving device by a user, whereupon the at least one phone number of said one or more phone numbers associated with said user-specific website is obtained and verified by a phone number detection device, establishing a website claim to the user-specific website if the phone number detected by the phone number detection device matches the at least one phone number of said one or more phone numbers associated with the user-specific website; and

completing the website claim by accessing a system website and accepting the user-specific website.

21. (Original) The method of claim 20, wherein the website claim is valid for a pre-defined length of time.

22. (Original) The method of claim 20, wherein the at least one phone number may also be verified by asking a user for the at least one phone number, disconnecting, and calling the user back at the at least one phone number.

23. (Original) The method of claim 20, wherein the confirmation of the website claim also requires the entrance of a personal identification number at the system website.

24. (Original) The method of claim 23, wherein the personal identification number is provided upon calling into the phone call receiving device.

25. (Currently Amended) A system for claiming a user-specific website where a website request is made for the user-specific website, the system comprising:

a phone calling device; and

a phone call data receiving device coupled to said phone calling device and a system website coupled to the Internet;

wherein:

the website request is performed at a system website by a user, establishing a website claim to one of a plurality of user-specific websites, each of said user-specific websites associated with at least one unique phone number; and

the website request causes a personal identification number to be sent to the phone call data receiving device through said at least one unique phone number associated with the claimed user-specific website.

26. (Original) The system of claim 25, wherein the website claim is completed by accessing the system website and entering the personal identification number.

27. (Original) The system of claim 25, wherein the phone call data receiving device is a call paging device.

28. (Original) The system of claim 25, wherein the phone call data receiving device is a facsimile device.

29. (Previously Presented) A method for claiming a user-specific website, comprising the steps of:

performing a website request at a system website by a user to establish a website claim to one of a plurality of user-specific websites, each of said user-specific websites associated with at least one unique phone number; and

sending a personal identification number to a phone call data receiving device using said at least one unique phone number associated with the claimed user-specific website in response to the website request.

30. (Original) The method of claim 29 further comprising:

completing the website claim by accessing the system website and entering the personal identification number.

31. (Original) The system of claim 29, wherein the phone call data receiving device is a call paging device.

32. (Original) The system of claim 29, wherein the phone call data receiving device is a facsimile device.
